Your stakeholders have commissioned an engagement.

Eighteen months ago you took up padel. Since then you have mentioned it in 94% of conversations lasting longer than four minutes. You have told a midwife it is the fastest-growing sport in the world. The racket bag is in the boot, and the buggy is not.

This is the programme pack: nine phases, twenty-six activities, stakeholder feedback from home and work, a daily padel budget, a relapse risk register and a certificate at the end, if you earn it.

For every padel convert who answers the 6am group chat before the baby, and for everyone who has to listen to him.
